European Journal of Operational Research 68 (1993) 431–432
North-Holland

Contents Volume 68

1 Developments in implementable retailing research (*Invited Review*)
A. Mercer
9 A methodology for competitiveness analysis and strategy formulation in glass industry
M. Oral
23 Performance characteristics of stochastic integrated production–distribution systems
D.F. Pyke and M.A. Cohen
49 Models for evaluating the performance of serial and assembly MRP systems
A.G. Lagodimos
69 The throughput rate of multistation unreliable production lines
C. Heavey, H.T. Papadopoulos and J. Browne
90 Stochastic analysis of a dependent parallel system
M. Pijnenburg, N. Ravichandran and G. Regterschot
105 Composing batches with yield uncertainty
C.S. Tang
120 Optimal ordering policies with two suppliers when lead times and demands are all stochastic
H.-S. Lau and L.-G. Zhao
134 Efficient post-optimization analysis procedure for the dynamic lot-sizing problem
M. Diaby
139 A conditional effect of autocorrelated demand on safety stock determination
H. Marmorstein and W. Zinn
143 OR Software, *H. Thiriez (ed.)*

145 Chaos in nonlinear dynamical systems exemplified by an R&D model (*Invited Review*)
G. Feichtinger and M. Kopel
160 An integrated multiobjective planning model: A case study of the Zambian copper mining industry
I.C. Ehie and C.O. Benjamin
173 A multiobjective approach to vendor selection
C.A. Weber and J.R. Current
185 Optimal scheduling of purchasing orders for large projects
B. Ronen and D. Trietsch
196 Application of the scenario aggregation approach to a two-stage, stochastic, common component, inventory problem with a budget constraint
H. Jönsson, K. Jörnsten and E.A. Silver
212 Due date assignment procedures with dynamically updated coefficients for multi-level assembly job shops
N.R. Adam, J.W.M. Bertrand, D.C. Morehead and J. Surkis
228 The analysis of an unreliable two-machine production line with random processing times
Y. Hong and D. Seong
236 Inspection interval for maximum future reliability using the delay time model
P. Cerone
251 Sequencing of inspection operations subject to errors
T. Raz and D. Bricker
265 Algorithms for computerized inspection of rectangular and square shapes
J.A. Ventura and Z.-A. Dung
278 Expert systems applications development research in business: A selected bibliography (1975–1989)
S.B. Eom, S.M. Lee and A. Ayaz

291 Forecasting with scenarios (*Invited Review*)
D.W. Bunn and A.A. Salo
304 Stock index futures arbitrage in Finland: Theory and evidence in a new market
V. Puttonen
318 On the individual and incremental information content of accrual earnings, cash flows and cash dividends in the Finnish stock market
T. Martikainen, T. Rothovius and P. Yli-Olli

0377-2217/93/$06.00 © 1993 – Elsevier Science Publishers B.V. All rights reserved

334 Cost analysis in the time domain
J.D. Camm, T.R. Gulledge and N.K. Womer
344 An interactive procedure for multiple objective integer linear programming problems
J.N. Karaivanova, S.C. Narula and V. Vassilev
352 A restricted class of multiobjective linear fractional programming problems
D. Dutta, J.R. Rao and R.N. Tiwari
356 Approximating the noninferior set in multiobjective linear programming problems
R.S. Solanki, P.A. Appino and J.L. Cohon
374 Use of reference points for MOLP problems analysis
B. Metev and I. Yordanova
379 Duality theory for infinite-dimensional multiobjective linear programming
A. Balbas and A. Heras
389 Some experiments with simulated annealing techniques for packing problems
K.A. Dowsland
400 An algorithm for the 2D guillotine cutting stock problem
B. MacLeod, R. Moll, M. Girkar and N. Hanifi
413 An exact search for the solution of the surrogate dual of the 0–1 bidimensional knapsack problem
A. Fréville and G. Plateau
422 A variation of the assignment problem
S. Geetha and K.P.K. Nair
427 On geometric programming problems having negative degrees of difficulty
D.L. Bricker, J.C. Choi and J. Rajgopal
431 Contents Volume 68
